Instructions
1. Start on any station square. Youngest player goes first. Direction of play is clockwise.
2. Use the spinner to decide how many squares to move.
3. Follow the instructions on the square you land on.
4. Pick up a karma card whenever you land on or pass a station. Keep the karma card.
5. The game ends when all karma cards are used.
6. Add up your karma card points. The player with the most points wins.

Spinner

1. Cut out the wheel and the arrow. Gluing them to card stock first makes them sturdier.
2. Pierce the red circles: the centre of the wheel and the round end of the arrow.
3. Join them with a brass paper fastener, loose enough for the arrow to spin freely.
4. Flick the arrow and move the number of squares it stops on.
